

## Rental Equipment Inspection Checklist

If you're in the business of renting out equipment, an inspection checklist will help you maintain that equipment in safe operating condition, which means saving money in the long run.

When used properly and diligently, these checklists will protect your assets and add an extra layer of accountability to ensure your business continues to run smoothly.

### What's in this Rental Inspection Checklist?

This equipment rental checklist is designed to help you inspect and maintain your rental business's equipment, after it's been returned by a customer and before it's rented out again.

Especially for vehicle rentals –

## Equipment Rental Inspection Checklist

### Basic Inspection

- Inspect the exterior of the equipment for any scratches, dents, or other visible damage
- Check the tread depth of the tires.
- Inspect the tires for nails or debris embedded in the rubber.
- Check the tire pressure
- Inspect headlight and tail light function
- Inspect undercarriage of vehicle for leaks or damage
- Check the brake function

### Engine Inspection

- Check the engine oil level
- Check spark plug functionality
- Inspect air filters for damage or clogs, and replace if needed

### Vehicle Interior

- Test the vehicle or equipment controls
- Check the conditions of any windows on the vehicle
- Inspect the interior – seats, dashboard, etc – for wear and tear
